

The surgeons of the Bochner Eye Institute have published more than 35 textbooks in the field of Ophthalmology.

Drs. Harold Stein, Albert Cheskes, and Raymond Stein have received recognition awards from Canadian, American, and International organizations.

## Laser Vision Correction: A New Age (Second Edition)

This is the latest book that provides an in-depth discussion of laser vision correction and alternative surgical options.

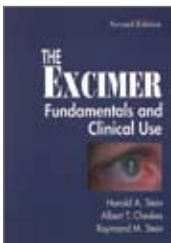

## Management of Ocular Emergencies (Fourth Edition)

This book reviews all of the ocular emergencies by discussing the presenting symptoms, signs, suggested workups, and treatment options.

## The Ophthalmic Assistant (Eighth Edition)

This is the primary textbook used around the world to educate ophthalmic personnel about the field of ophthalmology.

## THE EXCIMER – Fundamentals and Clinical Use (Second Edition)

The Bochner Institute doctors wrote the first clinical textbook on excimer laser surgery to train surgeons on the techniques of laser vision correction.
